

## Autosheen/Aquasheen

Following the demise of Aquasheen late last year (2013) we have been seeking alternative topside restoration contractors. We are delighted to announce that, following up a report from Lymington based owners, we now have **Matt Daly** of **Southern Amphibious** on board. Matt is a qualified boatbuilder, comes highly recommended and will be working to the SOA procedure sheets, which is good news for the SOA as it maintains the standard and progress we have made over the past four years.

Matt's prices are very competitive and although his area of operation is principally along the South Coast (Poole to Chichester), he is prepared to go further afield if necessary. Matt can be contacted at [www.southernamphibious.com](http://www.southernamphibious.com), tel: 07825 664557.

For those further east, we have heard that **Terry Andrews** (tel: 0789 995 2250), an ex-Aquasheen franchisee, also offers a boat polishing service in the Chichester area. No further details at this time, but there are good reports from the small number of owners who have used him

As mentioned before, we would advise caution when approaching someone new, even if still operating under the Aquasheen name. Before commissioning any work we recommend that owners discuss with the contractor how their boat will be cleaned and whether they will be using the correct Farécla process and materials. Instructions for all hull restoration processes are contained elsewhere in this section of the website.

We will keep this page updated as information is received, so if you have had good service, please let us know.
